

# G6DN

PCB Power Relay

## SPST Slim Power Relay for 5 A switching

- Slim 5-mm width and miniature size. (20 × 5.08 × 12.5 mm)
- High switching capability 5 A (250 VAC and 30 VDC), and high contact reliability by crossbar-twin contact.
- Low power consumption 110 mW.
- Meets application standards EN61010-1 and EN61010-2-201 for reinforced insulation (CTI 600 V min. and Rated insulation voltage 300 V). (Except G6DN-1A-CF Models)
- Actualize electrical durability 100 Kops (-L type)
- Lineup of high temperature types with an ambient temperature of 105°C (-CF type)

### Model Number Legend

G6DN-□□□-□□  
1 2 3 4 5

#### 1. Number of Poles

1: 1-pole

#### 2. Contact Form

A: SPST-NO (1a)

#### 3. Enclosure Rating

None: Fully sealed

#### 4. Classification

None: Standard (E-LIFE 80 Kops)  
L: High durability type (E-LIFE 100 Kops)  
SL: General purpose

#### 5. Coil Insulation Class

None: Class B  
CF: Class F (High temperature)

### Application Examples

- Programmable Controller output
- Temperature Controller
- Building Automation
- Output of control system

### Ordering Information

| Classification   | Contact form | Enclosure rating | Terminal shapes | Model      | Minimum packing unit |
|------------------|--------------|------------------|-----------------|------------|----------------------|
| Standard         | SPST-NO (1a) | Fully sealed     | PCB terminal    | G6DN-1A    | 25 pcs/ tube         |
| High durability  |              |                  |                 | G6DN-1A-L  |                      |
| General purpose  |              |                  |                 | G6DN-1A-SL | 100pcs/tray          |
| High temperature |              |                  |                 | G6DN-1A-CF |                      |

Note 1. When ordering, add the rated coil voltage to the model number.

Example: G6DN-1A DC5

Rated coil voltage

However, the notation of the coil voltage on the product case as well as on the packaging will be marked as □□ VDC.

Example: G6DN-1A 5VDC

Note 2. When placing an order, please specify the number in package multiples.

## ■ Ratings

### ● Coil

| Classification   | Rated voltage | Rated current (mA) | Coil resistance (Ω) | Must operate voltage (V) | Must release voltage (V) | Max. voltage (V) | Power consumption (mW) |
|------------------|---------------|--------------------|---------------------|--------------------------|--------------------------|------------------|------------------------|
|                  |               |                    |                     | % of rated voltage       |                          |                  |                        |
| Standard         | 4.5 VDC       | 24.4               | 184                 | 70% max. *               | 5% min.                  | 160%             | Approx. 110            |
|                  | 5 VDC         | 22.0               | 227                 |                          |                          |                  |                        |
|                  | 12 VDC        | 9.2                | 1,309               |                          |                          |                  |                        |
| High durability  | 24 VDC        | 4.6                | 5,236               |                          |                          |                  |                        |
|                  | 5 VDC         | 36.0               | 139                 |                          |                          |                  |                        |
|                  | 12 VDC        | 15.0               | 800                 |                          |                          |                  |                        |
| General purpose  | 24 VDC        | 7.5                | 3,200               |                          |                          |                  |                        |
|                  | 5 VDC         | 22.0               | 227                 |                          |                          |                  |                        |
|                  | 12 VDC        | 9.2                | 1,309               |                          |                          |                  |                        |
| High temperature | 24 VDC        | 4.6                | 5,236               |                          |                          |                  |                        |
|                  | 4.5 VDC       | 24.4               | 184                 |                          |                          |                  |                        |
|                  | 5 VDC         | 22.0               | 227                 |                          |                          |                  |                        |
|                  | 12 VDC        | 9.2                | 1,309               |                          |                          |                  |                        |
| High temperature | 24 VDC        | 4.6                | 5,236               |                          |                          |                  |                        |
|                  | 4.5 VDC       | 24.4               | 184                 |                          |                          |                  |                        |
|                  | 5 VDC         | 22.0               | 227                 |                          |                          |                  |                        |
| High temperature | 12 VDC        | 9.2                | 1,309               |                          |                          |                  |                        |
|                  | 24 VDC        | 4.6                | 5,236               |                          |                          |                  |                        |
|                  | 4.5 VDC       | 24.4               | 184                 |                          |                          |                  |                        |

Note. The rated current and resistance are measured at a coil temperature of 23°C with a tolerance of ±10%.

\* Operating voltage is less than 72% when the relay is sideways and the marking is right way.

| Failure rate (P level)<br>(reference value *3) |                                       | 0.1 mA at 0.1 VDC   |  |  |   |
| Ambient temperature                            | Operating                             | -40°C to +90°C (with no icing or condensation)  |  |  | -40°C to +105°C *4<br>(with no icing or condensation)   |
| Humidity                                       |                                       | 5% RH to 85% RH   |  |  |   |
| Weight   |                                       | Approx. 3 g   |  |  |   |

Note. This value was measured at a switching frequency of 120 operations/min.

\*1. Values in the above table are initial values.

\*2. The contact resistance is measured with 1 A applied at 5 VDC using a fall-of-potential method.

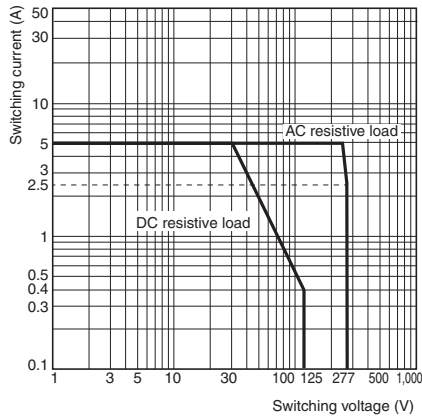

\*3. The insulation resistance is measured between coil and contacts and between contacts of the same polarity at 500 VDC.

\*4. For installation, please see "● Mounting" on page 6.

## Engineering Data

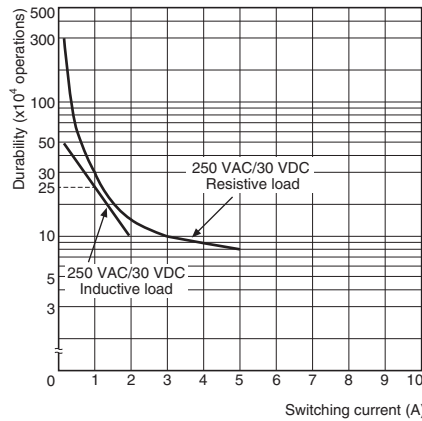

### Maximum Switching Capacity

#### G6DN-1A, G6DN-1A-L, G6DN-1A-CF

### Durability

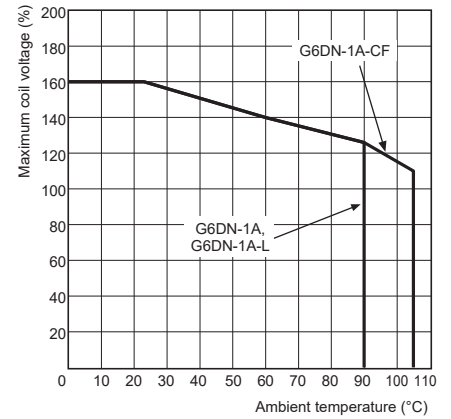

#### G6DN-1A, G6DN-1A-CF

Note. The durability curve is based on room temperature data.

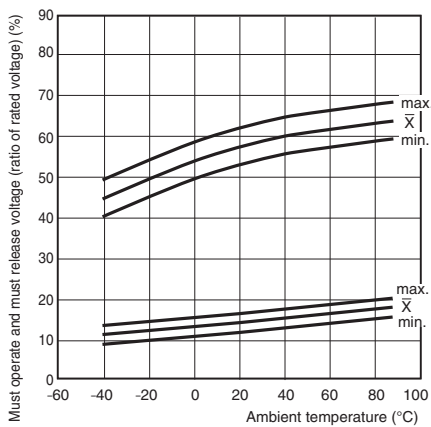

### Ambient Temperature vs. Maximum Coil Voltage

#### G6DN-1A, G6DN-1A-L, G6DN-1A-CF

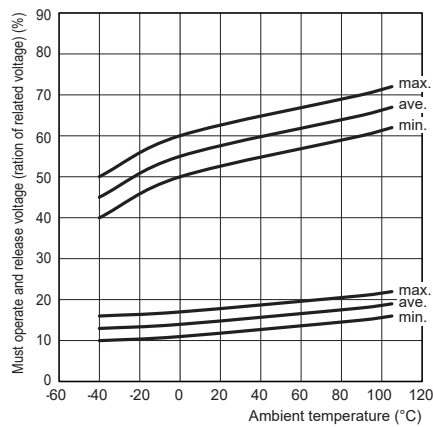

Note. The maximum coil voltage refers to the maximum voltage in a varying range of operating power voltage, not a continuous voltage.

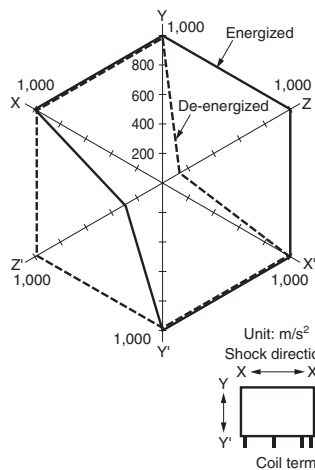

### Ambient Temperature vs. Must Operate and Must Release Voltages G6DN-1A, G6DN-1A-L

### G6DN-1A-CF

### Shock Malfunction

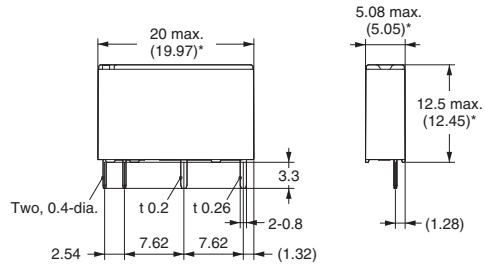

Sample: G6DN-1A  
 Number of Relays: 5 pcs  
 Test conditions: Impose a shock in the  $\pm X$ ,  $\pm Y$ , and  $\pm Z$  directions three times each with the Relay energized to check the shock values that cause the Relay to malfunction.  
 Standard: 100 m/s<sup>2</sup>

## ■Precautions

●Please refer to “PCB Relays Common Precautions” for correct use.

### Correct Use

#### ●Mounting

When mounting a number of relays on a PCB in 90°C to 105°C, be sure to provide a minimum mounting space of 1.27 mm min. as shown below.

Please check each region's Terms & Conditions by region website.
