

INFORMATION SHEET FOR CONNECTED PRODUCTS

In accordance with the requirements of Art. 3 (2) of Regulation (EU) 2023/2854 (Data Act), the following product information related to product [E8Y] is provided.

1. Type, format, and estimated volume of data

- **Type of data** : The data generated by the product includes the pressure value and the current, minimum, and maximum temperatures inside the sensor.
- **Data format** : The data generated by the product is displayed on a 7-segment display. The output format is NPN/PNP output. It will be activated when the pressure value exceeds the set threshold.
- **Estimated volume** : There is no output of digital data.

2. Data generation

The pressure value and current temperature inside the sensor are continuously output after the power is turned on. The minimum and maximum temperatures inside the sensor are generated when they are updated.

3. Storage and retention

- **Data storage location** : Only the minimum and maximum temperatures inside the sensor are stored in the product's non-volatile memory.
- **Retention duration** : There is no setting for the retention period.

4. Access, retrieve or erase data

- **Access and retrieve** : The data is displayed on the 7-segment display through user operation. For detailed instructions on how to operate, please refer to the user manual.
- **Erase data** : There is no method to delete the data.

5. Updates on data usage or changes to the product

- **Change Notification** : No modifications to the specifications will be made after the product has been sold.
